

The Sketchbook of Wonders

Alicia Janonis

Oliver's Cosmic Quest

Oliver discovers a leather-bound sketchbook hidden beneath a stack of old maps in his grandfather's attic. When he touches the yellowed pages, a faint golden glow begins to pulse from the edges of the paper, illuminating the dusty room. He picks up a charcoal pencil and feels a strange, tingling energy flowing through his fingertips.

Oliver & The Dreamweaver Dragon

The boy draws a swirling door on a blank page, and suddenly he is standing in a vibrant forest where the trees have trunks of silver and leaves made of colorful stained glass. Sunlight filters through the canopy, casting kaleidoscopic patterns across the mossy ground as clockwork birds chirp from the metallic branches. Every detail he imagined has come to life in a breathtaking display of light and color.

To find his way back, Oliver sketches a gentle dragon composed of soft white clouds and shimmering stardust to carry him through the evening sky. They soar high above a miniature village as the first stars begin to twinkle, drifting peacefully over the horizon. As he touches the final page, he realizes that his imagination is a map to endless worlds yet to be drawn.
