

THE HYBRID PERIMENT

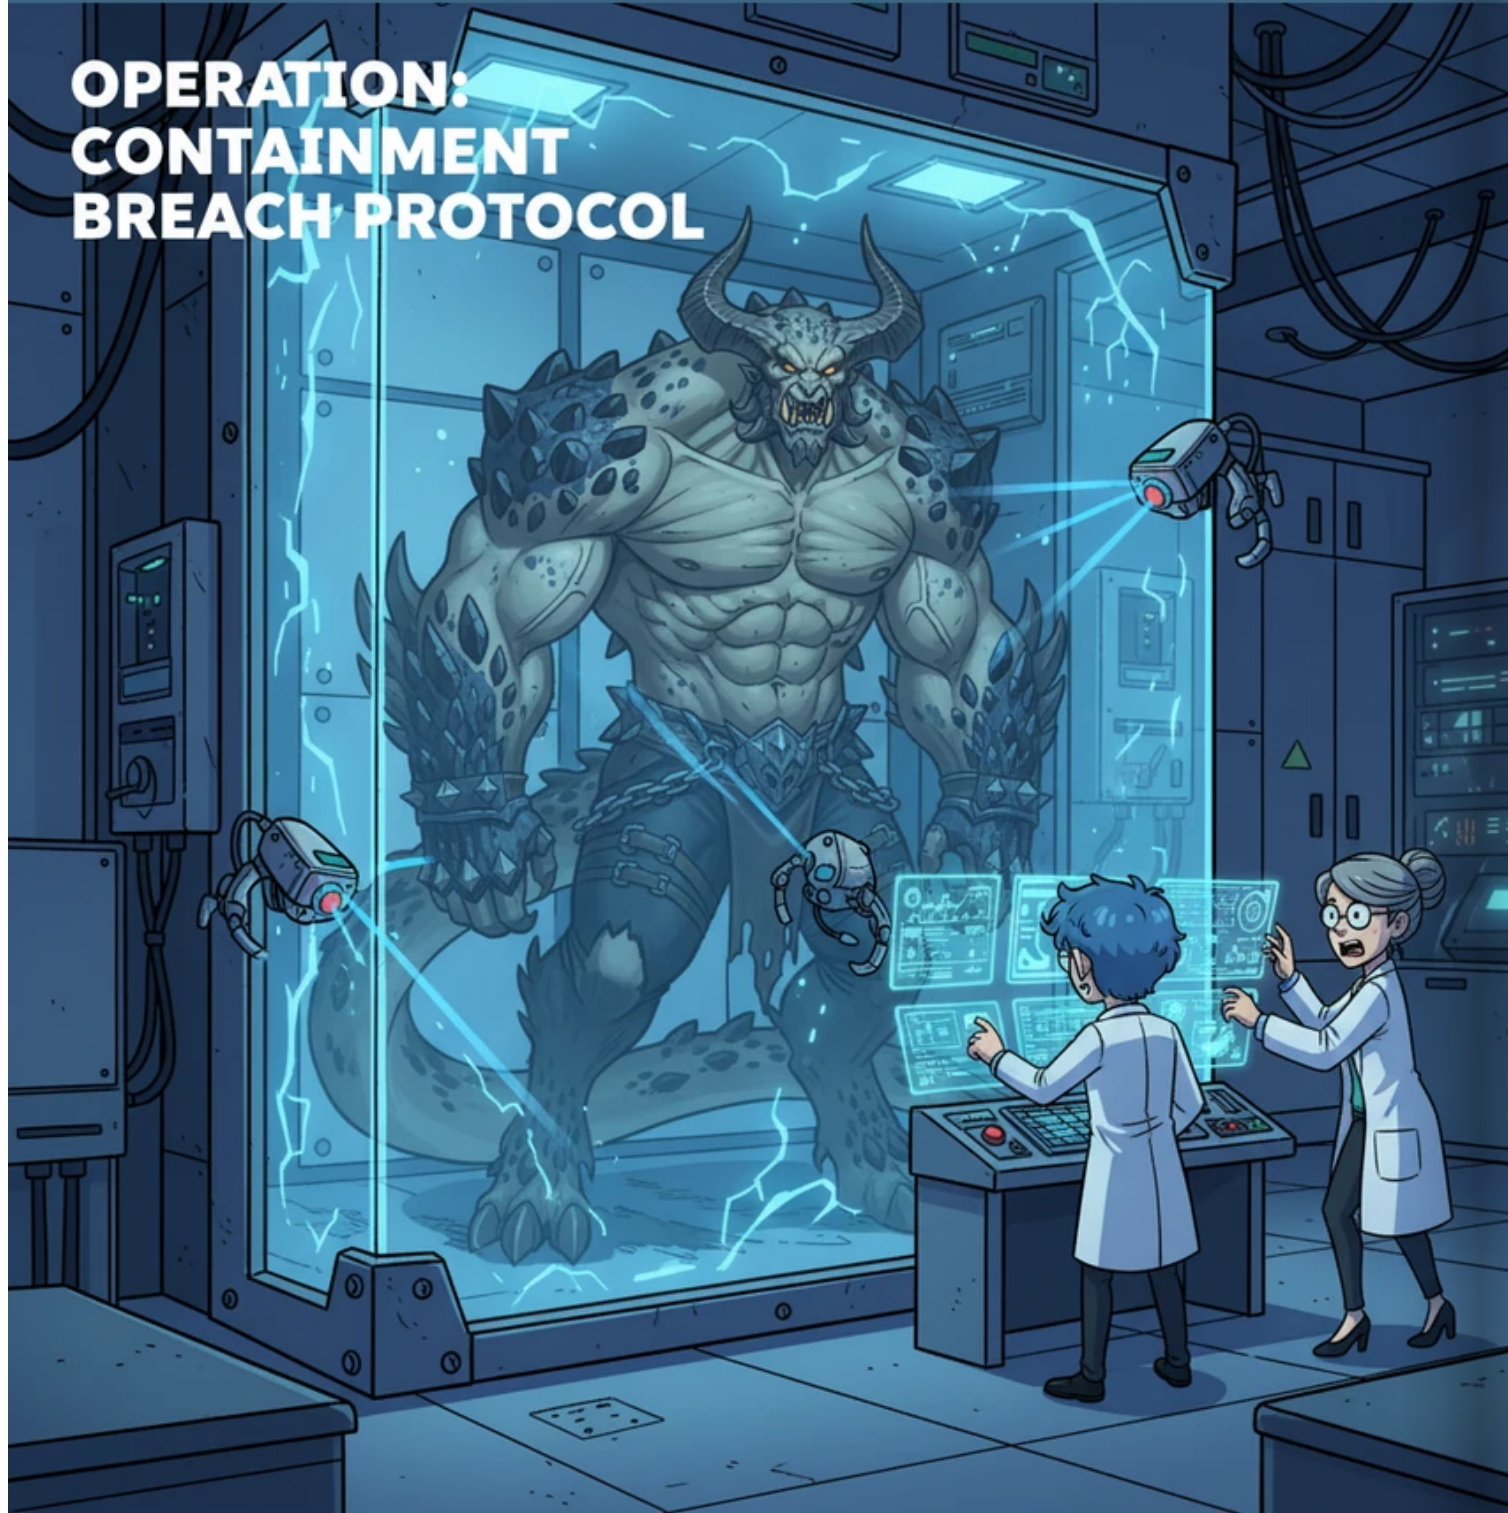

BOOK ONE

Silent Bond: Subject 001

Rei

OPERATION: CONTAINMENT BREACH PROTOCOL

Deep within the shadows of a high-tech laboratory, Subject 001 paces his reinforced cell like a caged god. His hybrid form is a terrifying blend of human and monster, possessing strength that has ended lives with a single blow. The facility staff trembles at his name, fearing the beast that refuses to be tamed.

A young, mute scientist named Rei is assigned the suicidal task of administering 001's medication. While his colleagues prepare to shred his paperwork, certain he won't return, Rei remains eerily calm. He carries the tray with steady hands, his expression unreadable and his silence louder than any warning.

The heavy blast doors hiss open, and Rei steps into the dim, humid air of the containment zone. Behind the observation glass, scientists hold their breath, expecting a bloodbath. Rei doesn't wait for the creature to settle or for the guards to intervene; he simply walks forward.

Sensing an intruder, Subject 001 lets out a guttural roar and lunges with lethal speed. His claws are inches from Rei's throat, and the air crackles with the threat of immediate violence. The monster's eyes glow with a feral hunger, ready to tear the newcomer apart.

Instead of flinching, Rei stops and levels a piercing, cold glare directly into 001's eyes. The monster suddenly freezes, his predatory instincts overridden by a strange, magnetic authority radiating from the silent man. For the first time in history, the dangerous subject stands perfectly still.

With clinical precision, Rei reaches out and administers the injection into the monster's arm. The scientists in the control room stare in disbelief as the beast remains compliant under Rei's unwavering gaze. The impossible task is finished in seconds, and Rei turns to leave without a word.

Before Rei can reach the door, a massive hand wraps around his waist, pulling him back with surprising gentleness. 001 clings to him like a desperate child, his monstrous pride replaced by an overwhelming need for contact. He refuses to let go, his body trembling as he anchors himself to the only person who wasn't afraid.

The monster growls a single, possessive word—Mine—as he pulls Rei onto his lap. The scientists watch in stunned silence, their monitors recording the impossible shift in 001's behavior. Rei's composure finally breaks, his eyes wide as he finds himself trapped in the creature's powerful embrace.

SUBJECT 001

REI

To everyone's shock, 001 leans down and presses a firm, demanding kiss against Rei's lips. Rei freezes, a deep crimson blush spreading across his face as the world around him disappears. In that moment, the boundary between scientist and subject vanishes, replaced by a raw, undeniable spark.

The tension drains from Rei's body as he leans back against the monster's broad chest, overwhelmed and exhausted. As he falls into a deep sleep in the hybrid's lap, a rare, genuine smile touches 001's lips. The most dangerous subject in the world has finally found his peace, cradling his silent treasure in the dark.
