

# Leo and the Magic Crayon

Muh musrifal Musrifal

THE DISCOVERY

Leo discovers a mysterious, empty coloring book hidden in his toy chest that seems to pulse with a faint light.

When he touches the pages, Leo is magically transported into a world where everything is just a simple black and white outline.

He walks through a forest of paper trees and notices that the birds and animals are waiting for someone to give them color.

In his hand, Leo finds a glowing golden crayon that can create every color of the rainbow with just a single stroke.

Leo begins by coloring a large, friendly sun in the corner of the sky, and suddenly the paper world feels warm and bright.

He meets a sad, colorless dragon who wants to look fierce, so Leo carefully colors his scales with shades of emerald green and fire red.

The dragon is so happy that he takes Leo for a flight over a vast ocean that Leo paints with deep blues and sparkling turquoises.

They land in a garden where Leo uses his magic crayon to draw and color beautiful flowers that begin to dance and sing.

Leo realizes that his imagination is the most powerful tool of all as he fills the final blank pages with a magnificent, colorful castle.

The world is now a beautiful masterpiece, and Leo wakes up back in his room with his favorite crayon and a heart full of bright ideas.
