

Oliver's Journey Through the World of Words

Gaspard Kouebe

THE CLASSROOM OF WONDERS

Oliver steps into the Classroom of Wonders, where floating letters of the English alphabet dance around him in a soft glow. He listens carefully as the magical chalkboard displays classroom instructions, guiding him to sit and begin his grand linguistic quest.

At the village gates, Oliver meets the friendly Greeting Guardians who teach him how to say hello, introduce himself, and bid farewell. They exchange relevant questions and answers, unlocking the path forward with the power of polite conversation.

Oliver enters a shimmering tower filled with ticking clocks and glowing calendars that mark the passing days and months. He counts golden coins to practice his numbers and uses articles like 'a' and 'the' to label the mysterious artifacts he finds tucked away in corners.

Standing before the Mirror of Identity, Oliver learns about the human body and the many pronouns that describe who he is. He practices using the verb 'to be' as his reflection changes to show his different moods and the strength of his spirit.

THE GARDEN OF EVERYDAY LIFE

A RHYTHM OF MAGIC & ROUTINE

In the Garden of Everyday Life, Oliver observes the daily routines of magical creatures using the simple present tense. He gathers quantifiers like 'some' and 'many' while noticing how the plural of nouns changes the shape of the flowers blooming around him.

Oliver climbs the great Family Tree, discovering ancient branches that represent his ancestors and relatives. He uses the present perfect tense to talk about the many experiences he has had since his journey into the world of words began.

Moving into the Animal Kingdom, Oliver meets talking creatures who tell him about their exciting plans using the simple and near future tenses. He watches a brave lion preparing to hunt and a colorful bird that is going to fly south for the coming winter.

ACTION ARENA

In the Action Arena, Oliver practices his gerunds while running, jumping, and climbing through a series of energetic obstacles. He learns to use modal auxiliary verbs to express what he can, must, and should do to complete his physical and mental training.

Oliver wanders through the Forest of Descriptions, where adjectives make the trees taller and the colors more vivid than anywhere else. He compares the sizes of magical plants using comparative and superlative adjectives while adverbs describe how gracefully the glowing leaves fall to the ground.

THE FINAL CHALLENGE

Finally, Oliver reaches the Bridge of Mastery, where he masters phrasal verbs and irregular verb forms to safely cross the crystal waters. He looks back at his progress with a smile, confident in his ability to speak and understand the beautiful English language.
