

## My Favourite Season

Yasmine Amdouni (Mayna)

Leo stands by the classroom window and looks at the beautiful sunshine outside. Miss Green asks the students a very interesting question. She wants to know about everyone's favorite season of the year.

Leo raises his hand high and smiles with excitement. He says that he loves spring because the weather becomes warm and pleasant. In the garden, bright green leaves grow on the trees and colorful flowers open their petals.

Mia stands up next and shares her thoughts with the class. She explains that summer is her absolute favorite time of the year. The days are long and sunny, and she loves to swim in the cool blue pool.

Sam waves his hand and speaks with a happy voice. He says that autumn is the best season for him. The leaves on the tall trees change from green to bright yellow, orange, and deep red.

Sam explains more about the fun activities in the autumn season. He says that he jumps into big piles of dry leaves with his friends. Cool winds blow through the playground, and the air feels fresh and crisp.

Then, Chloe speaks to her classmates about the magic of the cold months. She says that she prefers winter because everything looks beautiful. She wears a thick red coat, warm mittens, and a cozy hat outside.

Chloe describes how soft, white snow falls gently from the grey sky. She builds a big, cheerful snowman in her front yard with her brother. They give the snowman a carrot for a nose and a warm scarf.

Miss Green smiles warmly at all the children in the classroom. She tells the students that every single season is special and important. The changing seasons help the plants grow and give the animals food.

Leo looks at his friends and realizes something wonderful about the year. Each season brings different colors, games, and happy memories for everyone. He feels glad that the world changes throughout the year.

The bell rings, and the children pack their bags to go outside to the playground. They walk together under the bright sky and enjoy the beautiful day. They all agree that every season brings its own special joy.
