

Anya's Amazing Adventure: Discovering Our  
Rights!

by Palani Kumar

Anya lived in a cozy village nestled beside a sparkling river. She loved exploring the world with her best friend, a playful squirrel named Squeaky. One sunny morning, Anya felt a rumbling in her tummy, a sign of hunger. Squeaky pointed to a poster: 'Every child has the right to food, shelter, and healthcare!'

Anya and Squeaky followed a winding path and arrived at a food distribution center. Sadly, some children were being turned away because there wasn't enough food. Anya, with her quick thinking, suggested they help plant more crops to solve the problem. Soon, everyone had plenty to eat.

The next day, Anya and Squeaky arrived at a school. They learned about the right to education. A grumpy badger blocked their path because he didn't want the children to have fun learning. Anya and Squeaky convinced him that school could be exciting with games and friends. The badger had a change of heart.

One day, they found a group of children working in a dangerous factory, and Anya remembered the right to protection. They worked together with the local authorities and helped the children to a safe place where they could play and feel safe. Anya learned that every child has the right to protection from harm.

Anya and Squeaky then met a group of children arguing about a new playground. Anya knew everyone had a right to be heard! They organized a meeting where everyone shared ideas, and they created the most amazing playground ever. Everyone agreed on the best design.

Finally, Anya and Squeaky played hide-and-seek with friends in a sunny field, celebrating the right to play and leisure. Anya smiled, understanding that every right mattered and made the world a happier place. She knew everyone, big and small, had the right to be a child, always and forever!
